

BALAKRISHNAN SRINIVASAN

Senior Software Engineer | React Native | React.js | Full-Stack Development

+91 7598058190 / 8248676820 • balakrishnan.srini64@gmail.com • linkedin.com/in/balki14101 • github.com/balki14101

Summary

Senior Software Engineer with 4 years of experience delivering enterprise-grade React Native and React.js applications across the full development lifecycle, from frontend architecture to backend API design and cloud deployment. Led frontend development for an enterprise mental health assessment platform, maintaining feature parity across mobile and web through a modular, scalable component architecture for complex applications. Skilled in REST API design and integration (Python, Flask/FastAPI, Node.js), dynamic survey/workflow logic, AWS EC2/Docker-based deployment, and CI/CD pipelines. Has also guided backend and database architecture decisions and mentored developers across production systems, including a healthcare data platform.

Skills

Frontend: JavaScript, TypeScript, React.js, Redux, HTML5, CSS3, Responsive Web Design, REST API Integration, Authentication (JWT, OAuth)

Mobile: React Native CLI, Expo, Cross-Platform Development, Native Modules, React Navigation, Push Notifications, Async Storage, Play Store Deployment, Xcode, Gradle

Backend, Database & Cloud/DevOps: Python (Flask, FastAPI), Node.js, Express.js, REST API Design & Integration, MongoDB, Mongoose, PostgreSQL, AWS (EC2, S3), Docker, CI/CD (GitHub Actions), Firebase

Testing & Tools: Android Studio, API Testing & Validation (Postman), Payment Gateway (Razorpay), Integration Testing, Unit Testing (Jest), Performance Optimisation, Debugging (Native: Xcode, Android Studio), Git, GitHub, Jira, Agile/Scrum, Code Reviews, Technical Documentation, Claude, Claude Code

Collaboration & Communication: Work closely with UI/UX designers, backend developers, and QA teams; participate in agile development processes and sprint planning; provide technical guidance and mentorship to junior developers

Experience

Exafluence

Chennai, India

Senior Software Engineer

06/2022 - Present

Tech Stack – React Native, React.js, Python (Flask/FastAPI), Node.js, AWS, Docker

Enterprise Mental Health Assessment Platform

- Achieved consistent feature parity across React Native (mobile) and React.js (web) by architecting a modular, reusable UI component library.
- Simplified complex survey logic by engineering dynamic, branching workflows with real-time scoring and adaptive navigation across conditional question paths.
- Automated post-survey reporting by building a Python-based report-generation module that extracted survey data and integrated it directly into the core application workflow.
- Integrated Razorpay payment gateway for slot bookings, including order creation, signature verification, and webhook-based payment confirmation, and validated end-to-end flows using Razorpay's test/sandbox environment across success, failure, and retry scenarios.
- Designed and optimised REST API architecture using Flask/FastAPI, improving response times and reliability through structured endpoint design, request validation, and performance tuning across survey and reporting workflows.
- Strengthened application security by designing OTP-based authentication and authorisation mechanisms, alongside Flask/FastAPI REST API integrations, validated through Postman-driven integration testing and debugging before release.
- Improved release reliability by implementing CI/CD pipelines and Docker/AWS EC2 deployments for Android/Play Store releases, following agile development processes and sprint planning.

Native-to-Cross-Platform Migration | Silicon Valley-Based Client

- Modernised a native Android/iOS application by migrating biometrics, push notifications, and chat functionality into a unified React Native codebase with platform-specific native modules.
- Reduced cross-platform inconsistencies by standardising the UI through reusable React Native components, resolving integration issues surfaced during migration.

Healthcare Data Platform | Architecture & Technical Guidance

- Strengthened platform scalability and security by guiding backend and database architecture for a Node.js application, implementing role-based access control for authorisation.
- Accelerated team ramp-up by providing technical guidance and mentorship to junior developers on project setup and deployment planning, while collaborating with backend developers and QA teams and contributing to report-generation functionality.

SketchMonk

Bangalore, India

React Native Developer Intern

01/2022 - 05/2022

Tech Stack – React Native, REST APIs

- Built 5 production UI modules and integrated 10+ REST APIs, contributing to a 60% increase in user retention while improving app speed by 25% through rendering and state-management optimisation.

Trikara Technologies

Bangalore, India

Software Developer Intern

07/2021 - 10/2021

Tech Stack – React.js, REST APIs

- Built responsive UI components and integrated REST APIs for a booking and service-based application.

Personal Projects

DueMate | React Native, Expo

- Built a task-reminder app with customizable recurring schedules and due-date notifications, using AsyncStorage to handle data caching and offline functionality for local persistence.

Inshorts Clone | React Native, Redux

- Built a cross-platform news app with Redux, category-based browsing, and integration with the official Inshorts developer API.

QuickServe – In Progress | React Native, React.js, Node.js, MongoDB

- Building a multi-provider slot-booking marketplace with JWT role-based auth and atomic slot-locking to prevent double-booking; backend fully built and tested (15+ endpoints, Jest unit tests). React.js and React Native clients in development.

Education

SRM IST Chennai

06/2018 - 05/2022

B.Tech, Computer Science | CGPA: 9.3/10.0

Key Achievements

Company Recognition Award (Project Delivery Excellence): Recognised by Exafluence leadership for end-to-end ownership in delivering enterprise-grade applications, from architecture through production.

Engineering Excellence Certificate (Consistent Performance): Awarded for sustained high performance on high-visibility product features across multiple project cycles.
